About Me

As an experienced frontend web developer with expertise in React, I am passionate about creating responsive and user-friendly applications. I have a strong foundation in HTML, CSS, Bootstrap, JavaScript and related web technologies and I am constantly striving to improve my skills and stay up-to-date with the latest web development trends. My primary focus is on creating clean ,maintainable and scalable code using best practices and design patterns. I am committed to optimizing application performance and user experience and I always ensure cross-browser compatibility and accessibility.

Work Experience

Cephas Digital   May 2020 – June 2022

Frontend Developer

- My role in a web 3 project utilizing React as the primary stack. Responsible for creating an intuitive and seem less user interface.
- Work with the design and backend teams and to develop user friendly and responsive web applications.

SQI College of ICT   December 2022 – June 2023

Frontend Developer

- Designed and built responsive page with react.

Syllabux Limited   November 2023 til date

Internship (full stack developer)

- I have laid hands on many projects such as school website both National and international, and also deployed. I have singlehandedly built a functioning website for a company from the scratch. I have worked with other developers in and out of my work place.
